DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 are drawn to a stator structure classified in class 310, subclass 254.
 - II. Claim 16-18 are drawn to method of making a stator, classified in class 29, subclass 596.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions in groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different products or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different products for examples: a rotor core, a linear movable core, magnetic cores of magnetic sensors, component of magnetic bearings. Also, the stator structure as claimed can be made by another and materially various methods including automatic machinery process and/or manual process, wherein each process having various orders of fabricating steps. Also, the method of forming the stator body in the present invention's motor can be employed to form other magnetic elements.
